Topic/s in which I am interested	WASTE-7-2015: Ensuring sustainable use of agricultural waste, co-products and by-products		
Expertise offered and what I would like to do	Assessment of impact on air quality of biomass combustion sources. We are carrying out projects addressed to evaluate the impact on air quality from the use of wastes from specific agricultural sectors, such as olive oil production, as biomass feedstock in power generation and domestic heating. Onsite research performed in regions where all processes related with the		

	oil production and waste treatment are located. These regions are sources of waste and uses and could serve as case studies in the project for specific agricultural sector as establishes the SC5-WorkProgramme , Topic WASTE-7-2015.
